

# The Diver Solution™ Version 6.2: Facilitating User Adoption

6.2

The Diver Solution™ version 6.2 enables organizations to utilize DI's portal interface, DivePort, as an integrated BI scorecard and management decision making tool that mirrors an organization's corporate structure. This provides information transparency and creates "one version of the truth", a key factor in successfully deploying business intelligence solutions. Flexible administrative features allow consolidated data views to be customized and rolled-up based on your organizational structure, facilitating user adoption by providing users instant access to role-based metrics.

Experience the benefits:

- Deploy on a large scale, faster
- Ensure information flow mirrors organizational structure
- Display information in a way that drives coordinated action
- Tailor information display to user's role
- Minimize data interpretation

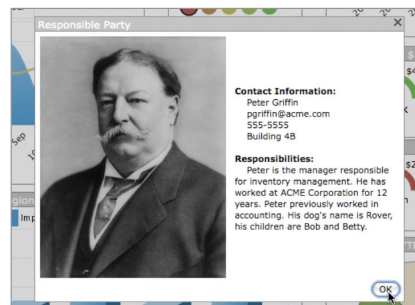

**SELF-SERVICE INFORMATION** Users have the ability to access detail data directly from dashboard views with a single click using DI's One-Click Command Center. Deliver customized views of data to your users that are appropriate to their particular roles and responsibilities within your organization.

**INTERACTIVE VIEWS LEAD TO BETTER DECISIONS** Version 6.2's interactive dashboards provide information to a user that is actionable. Contact information, detail data and supporting documents are instantly accessible from the dashboard allowing users to initiate follow up activities once alerted to a potential problem.

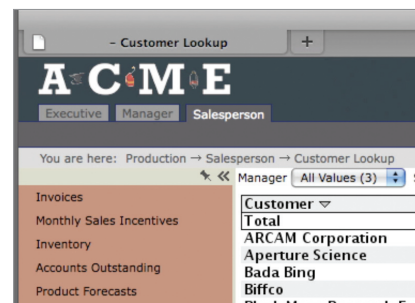

**STREAMLINED NAVIGATION** Upgraded tab-based navigation makes organizing and finding information a breeze. Alternate sidebar and breadcrumb navigation hides and displays less pertinent information as needed, maximizing the amount of viewable screen real estate available for dashboard views.

THE DETAILS BEHIND THE DATA ARE AUTOMATICALLY AVAILABLE TO THE END-USER WITHOUT THE NEED FOR ADDITIONAL REPORT REQUESTS, DEVELOPMENT TIME AND COMPLEX SCRIPTING SKILLS.

DISPLAY DATA IN A MANNER THAT GIVES IMMEDIATE DIRECTION AND GUIDANCE TO THE EMPLOYEE VIEWING THE INFORMATION.

STREAMLINED NAVIGATION ENSURES USERS ARE QUICKLY ABLE TO LOCATE THE INFORMATION THEY NEED TO RAPIDLY MAKE DECISIONS.

DATA → INFORMATION → ACTION
