

# The Diver Solution™ Version 6.2: More Graphical Presentation Options

# 6.2

Version 6.2 results in significantly reduced 'time-to-decision' by providing users with instant access to Key Performance Indicators (KPIs) and scorecards via dashboard views delivered using DI's enterprise web portal interface, DivePort. By providing more ways to graphically display data, communication of business-critical metrics can be accelerated allowing users to quickly develop action plans that impact performance in real-time.

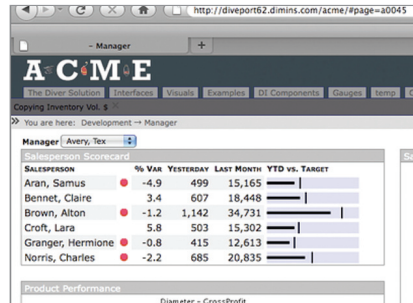

Experience the benefits:

- Enable rapid decision-making by recognizing trends quicker
- Provide role-based visual context to business-critical data
- Develop action plans in less time
- Visually communicate critical data from enterprise applications in a way that can be acted upon

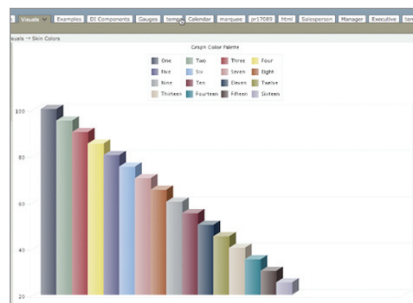

**SUPPORT VISUAL-BASED ANALYSIS** Visual-based analysis improvements make it easier for users to access, understand, share and act on information. Version 6.2 lets you pair traditional tabular views of data with indicators, bullet charts, gauges, trend lines and mini-graphs in order to provide users with contextual information on performance.

**APPLY VISUAL THEMES** A diverse collection of color palettes, called themes, can be customized to reflect a desired corporate look-and-feel. Color palettes can be assigned to each graphing option as well as to DI's portal interface, DivePort and DI's web-based analytics client, NetDiver.

**LIBRARY OF GRAPHICAL INDICATORS** Administrators have the ability to select a number of new indicator options when designing a dashboard. From color-based trend arrows to speedometers - dashboards views can be constructed to direct a user's attention instantly to areas of concern or interest, streamlining the decision-making process.

EASILY DISPLAY KPI-BASED PERFORMANCE THRESHOLDS IN A DASHBOARD VIEW. THIS ENSURES USERS CAN QUICKLY SEE ACTUAL VS. TARGETS AND GOALS IN A CONTEXTUAL MANNER.

ALL 6.2 GRAPHING OPTIONS HAVE A 16-ELEMENT COLOR PALETTE, DESIGNED TO BE COMPLEMENTARY TO THE COLOR THEME YOU APPLY TO YOUR DASHBOARD VIEW.

REDUCE 'TIME-TO-INFORMATION' BY USING ONE OF THE MANY NEW INDICATOR OPTIONS TO DIRECT ATTENTION TO KEY AREAS OF INTEREST ON ANY GIVEN PAGE.

DATA → INFORMATION → ACTION
