

Congratulations on taking this step towards recognition of your skills. As an existing Diver user, we recognize your knowledge and experience through certification as a DI Certified Diver.

To achieve this certification the following must be completed:

- An assessment test showing broad knowledge of the Diver Interface. This 20-question test contains multiple choice and short answer questions. A score of 80% or better should be achieved. This test will be administered via WebEx™ with Dimensional Insight or at the conclusion of pre-approved Diver training courses. To schedule a time for the assessment, please call George Seban at 781-229-9111 x1313 or email training@dimins.com. The test should take approximately 30 minutes.

To maintain this certification:

- The certification is valid for one year from award date.
- To renew, the certified individual should request re-certification. At that time the re-certification candidate must provide a sample of current work and demonstrate knowledge of the features in the latest release of the product.
