

Case Study:  
**MUTUAL DISTRIBUTING COMPANY**

**Sales Information Anywhere, Anytime:**  
DiveTab as a Company-Wide Mobile Solution

**Mutual Distributing Company** is a beer and wine wholesaler based in North Carolina. By acquiring other wholesalers over the years, Mutual Distributing has expanded its distribution territory to cover the entire state.

**Quick Facts:**

**Organization:** Mutual Distributing Company

**Location:** Raleigh, NC

**Customer since:** 2000

**Solutions:** Diver Platform, DiveTab

**Website:** [mutualdistributing.com](http://mutualdistributing.com)

**Company Description:**

Mutual Distributing Company is a statewide beer and wine wholesaler in North Carolina. It has more than 14,000 customers, distributes 9,000 products, and employs more than 500 people in seven locations throughout the state.

**MUTUAL NEEDED A MOBILE SOLUTION FOR ITS ON-THE-GO SALES TEAM OF 200+**

For nearly two decades, Mutual Distributing has gained insight into its sales operations through Dimensional Insight’s Diver Platform, a business intelligence solution. With Diver, salespeople and their managers are able to access critical goal and quota data via web-based dashboards.

In the last several years, Mutual realized that it needed a way to bring this information to its sales team in real-time, meaning data needed to be accessible on the road via mobile devices. As Mutual was trying to settle on a solution, the organization had two decisions to make. First, what kind of a mobile device did it want its salespeople to use? And second, how could Mutual manage its sales information on the device it selected?

Mutual decided on iPad® Minis as the go-to device because of the stability and ease of use of the Apple iOS® and the convenient size of the iPad mini screen. This meant it was a good compromise for a device the salespeople would be

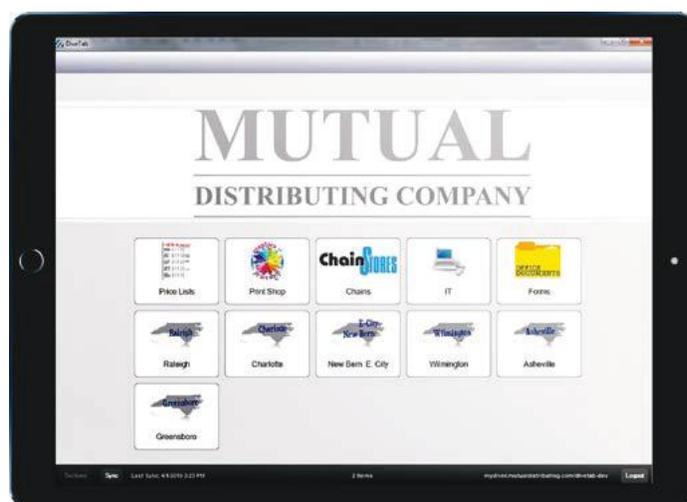

able to easily handle, yet large enough to effectively display information to their customers. Mutual had all of its salespeople using the devices by early 2015.

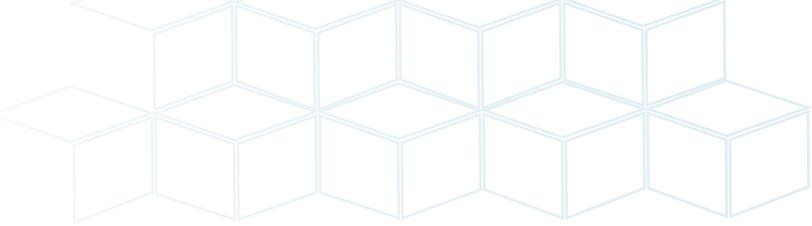

Once it had the hardware in place, Mutual wanted to provide its salespeople with more information. So Mutual focused on five main pieces of content.

**THE COMPANY WANTED TO:**

- Distribute documents, forms, and price lists.
- Distribute presentations that salespeople could show their customers.
- Provide dashboards to show salespeople how they were progressing during the month in terms of meeting their goals.
- Give salespeople the ability to do data analysis.
- Have the ability to share information with customers.

“That’s where DiveTab came in,” says Jim Staton, Mutual Distributing Company’s Vice President of Information Technology. “Because DiveTab made all of those things possible.”

“The benefits of DiveTab are enormous all the way around. The sales people have access to dashboards, as well as to documents, presentations, and some analytics that they didn’t have before.”

With DiveTab Mutual’s sales staff have quick and easy access to:

- Price Lists
- Documents
- Data Analytic Dashboards:
  - Case Goals
  - Quotas
  - Price List Queries
  - Territory Queries

“For IT, DiveTab has provided us with a level of flexibility and the ability to rapidly deploy effective and scalable business intelligence. For our customers, the salespeople have been able to provide them with more targeted information in a timelier manner. That all adds up to increased sales and satisfaction.”

*Jim Saton, Vice President, IT Mutual Distributing*

### HOW DIVETAB HELPS MUTUAL DISTRIBUTING COMPANY INCREASE SALES

Dimensional Insight’s DiveTab is a platform for mobile devices and PCs that allows Mutual’s salespeople to download different types of documents such as PDFs, spreadsheets, Word documents, or PowerPoint presentations. For example, price lists can be downloaded, and they can be broken down into whatever metrics the salesperson needs—whether that is beer price lists, promotion price lists, or a whole price list.

“We selected DiveTab because it supports both Windows® and iOS®, and it provided the ability to manage content,” says Saton. “We didn’t have to worry about going out and getting another vendor in order to distribute documents—we could do all that through DiveTab, and at the same time we were providing the dashboard and data analytics portion.”

DiveTab also allows Mutual Distributing to do data analytics, which for the company is broken down into six categories:

- Goals
- Quotas
- Market price lists
- Territory
- Customers
- Today’s orders

A salesperson can use each of these sections within DiveTab to compare sales performance from month to month or year to year, to look at how a product from a specific region is selling overall, how items or sales are performing within sales territories, and which orders are coming through. They can examine how many customers a salesperson is taking orders for or how much money the company has taken in for the day. DiveTab updates the orders about once a minute, allowing the sales team to get that information almost immediately.

“The benefits of DiveTab are enormous all the way around.

The salespeople have access to dashboards, as well as to documents, presentations, and some analytics that they didn’t have before,” says Saton. “For IT, DiveTab has provided us with a level of flexibility and the ability to rapidly deploy effective and scalable business intelligence. For our customers, the salespeople have been able to provide them with more targeted information in a timelier manner. That all adds up to increased sales and satisfaction.”
