

Diver Platform™ FOR MEDITECH

ALL-INCLUSIVE, END-TO-END BUSINESS INTELLIGENCE PLATFORM

Five-Time "Best-in-KLAS" winner in Business Intelligence/Analytics

INTEGRATING MEDITECH DATA

Healthcare organizations increasingly must measure their performance — operational, clinical and financial — to continuously improve and meet strategic goals. Regulatory reforms, reimbursement model changes and shifting demographic trends make this an economic imperative. By leveraging historical and

current patient data generated from EHR(s) and other health information technology (HIT) systems, hospitals can gain visibility into their performance and uncover actionable insights with which to drive quality, outcomes and cost improvements.

GETTING DATA OUT OF MEDITECH SYSTEMS

Business intelligence and analytics are essential enablers for performance measurement and management. While recognized as an EHR market leader, MEDITECH platforms can be challenging to get data out of whether using a data repository or not. It's a necessity to integrate data residing in other MEDITECH applications and non-MEDITECH HIT systems, as well as

to incorporate third party information such as benchmarks, patient satisfaction and payer data. Limited data interactivity and exploration capabilities can prevent users from making data-driven decisions, and slow response times can delay access to information and action.

MAXIMIZE YOUR MEDITECH DATA — WITH DASHBOARD-DRIVEN DIVER BUSINESS INTELLIGENCE

Business intelligence and analytics are essential enablers for performance measurement and management. While recognized as an EHR market leader, MEDITECH platforms can be challenging to get data out of whether using a data repository or not. It's a necessity to integrate data residing in other MEDITECH applications and non-MEDITECH HIT systems, as well as

to incorporate third party information such as benchmarks, patient satisfaction and payer data. Limited data interactivity and exploration capabilities can prevent users from making data-driven decisions, and slow response times can delay access to information and action.

“One key to our success was taking a modular, phased approach. We didn’t take the approach of developing a large data warehouse with every data element in it that we thought we might need. We stayed focused. It helped us get to a win faster and produce good results in a quicker fashion.”

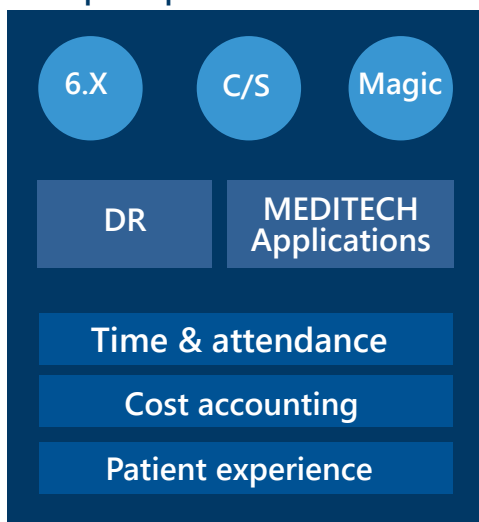

Cindy Peterson, VP/CTO
Henry Mayo Newhall Hospital

POWERFUL DATA INTEGRATION

Flexible data visualization provides users with the ability to easily identify trends and exceptions. Information can be presented in a number of ways — interactive maps, indicators, bullet charts, trend lines and gauges — to ensure users see the information in a context that is meaningful to them. Access to a business analytics environment is valuable only if users can easily answer data questions as

they arise. Diver’s unique ad hoc analytics let users view information at a summary level and then ‘dive’ directly into more detailed views to understand root causes. There are no SQL queries and no programming nor IT intervention required to explore and analyze the data.

WHY SELECT DIMENSIONAL INSIGHT TO LEVERAGE YOUR MEDITECH DATA?

Domain Experience

Hundreds of hospitals rely on Dimensional Insight for business intelligence reporting and analytics. For nearly two decades, Dimensional Insight has worked with healthcare organizations, both payers and provider organizations, to apply business intelligence and analytics to tackle their quality, productivity, clinical, revenue cycle and compliance challenges.

Breadth of Offerings

Dimensional Insight’s Diver is cost effective. There’s no need to invest in a data warehouse or purchase additional hardware. Diver’s Spectre™ processing engine is fast, reliable and flexible. Plus, Dimensional Insight offers a suite of applications that address key challenges in physician performance management, surgical services utilization and efficiency and meaningful use compliance.

Market Leader

Dimensional Insight is the only business intelligence/analytics vendor recognized by KLAS Research as the five times Best-in-KLAS winner. Dimensional Insight’s market leadership is also reflected in our partnership with the Premier healthcare alliance as their designated partner for business intelligence and analytics.

Results

Dimensional Insight’s Diver allows hospitals to implement business intelligence initiatives faster and more cost-effectively than traditional business intelligence and analytics solutions. Dimensional Insight’s team is with you every step of the way to ensure a quick and successful installation.

DIVER SUPPORTS ALL TYPES OF BUSINESS AND CLINICAL USERS

Quality directors

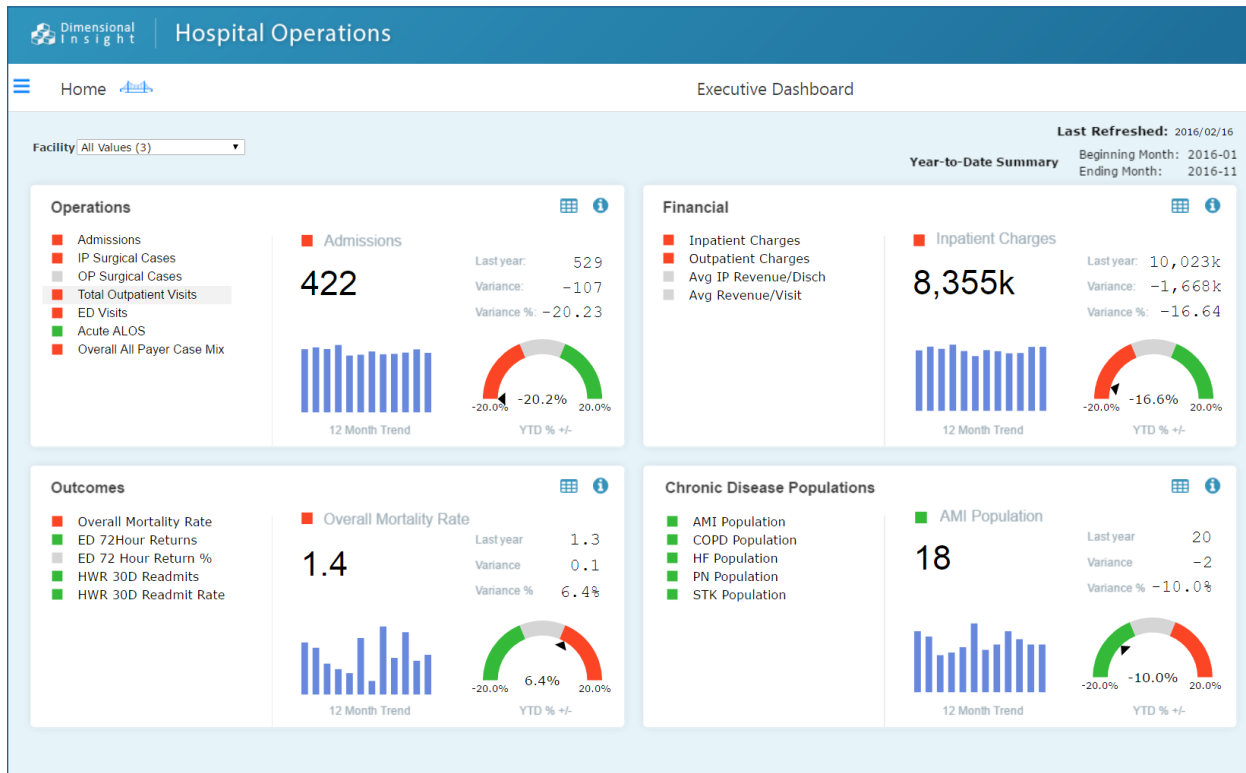

Quality Directors use Diver to aggregate data from MEDITECH and other applications, clinical risk grouping software and external surveys to compute, summarize and analyze quality measures that help them drive performance improvement initiatives.

Clinician leadership

Quality Directors use Diver to aggregate data from MEDITECH and other applications, clinical risk grouping software and external surveys to compute, summarize and analyze quality measures that help them drive performance improvement initiatives.

Finance & C-suite

Finance and C-suite use Diver to reduce operating costs through improved resource utilization in areas such as bed management and OR operations, analyzing orthopedic implants and renegotiating orthopedic implant pricing and number of vendors used, and optimizing staffing productivity.

Here's Diver's Executive Dashboard

- 4 interactive quadrants
- 7 different KPI views within each quadrant
- 6 data points within each KPI

That's **68 report items** all at your disposal with a single mouse click. No additional report writing. No requests for additional data. No waiting. Request screen views: marketing@dimins.com.

"Diver enables us to get information into the right hands at the right time. And it does so more quickly and cost-effectively than other business intelligence solutions we considered could. What also really impressed me about Dimensional Insight was that I was able to talk to Dimensional Insight's MEDITECH customers and verify the ease-of-use and results they were able to realize through the technology."

William Byers, Chief Technology Officer
Western Maryland Health System
