Menu

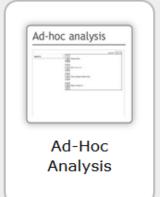

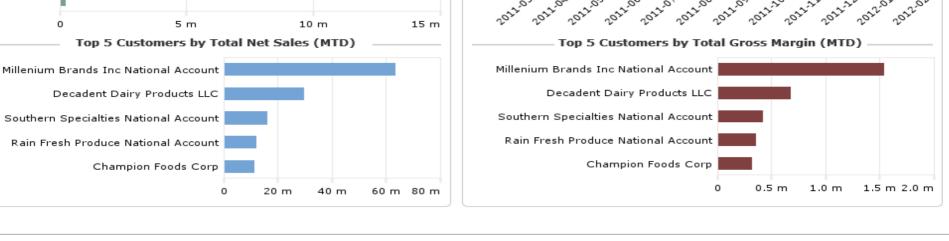

Executive Dashboard

Your key metrics rolled up into a single view. "Dive" down access to detail is available through our built-in analytics clients (ProDiver or NetDiver) or simply export to Excel for further analysis.

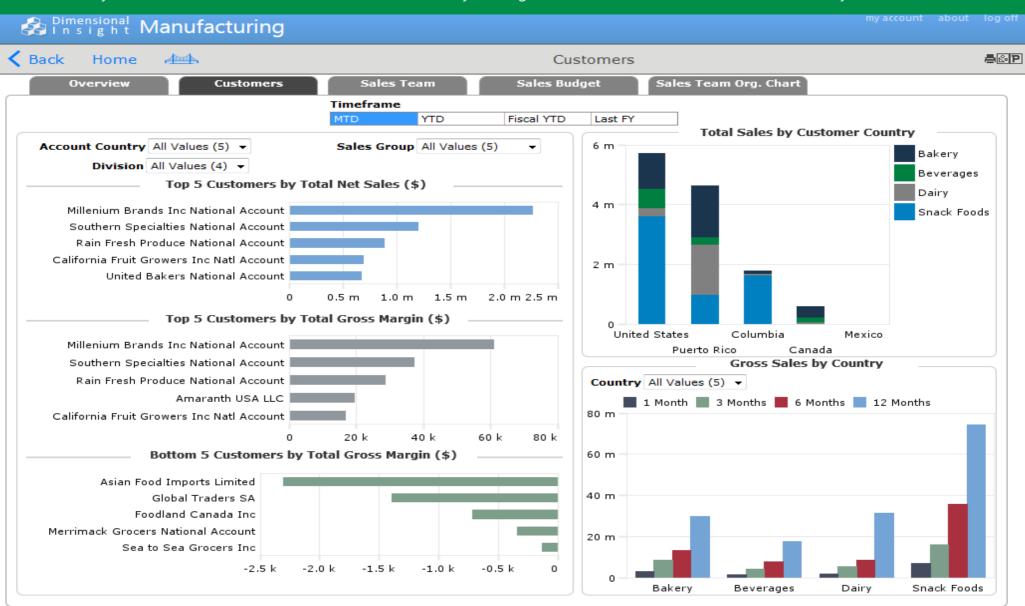

Key Financial Metrics

Provide Executives and departmental analysts with a consolidated view of financial performance by bringing data together from your disparate systems (CRM, ERP, General Ledger, Accounting Systems, Sales History) to better manage financial performance.

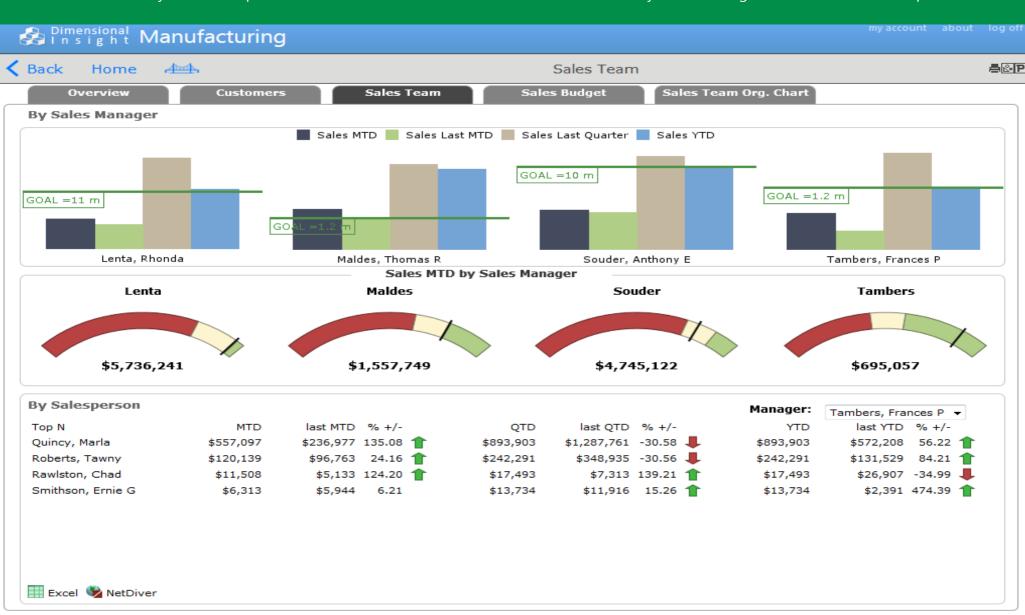

Customer Performance and Top Sales Data

Identify opportunities for improvement by rolling up best and worst performing customers into a dashboard view. Immediately access detail within the dashboard environment by clicking on items of interest to Dive into further analysis.

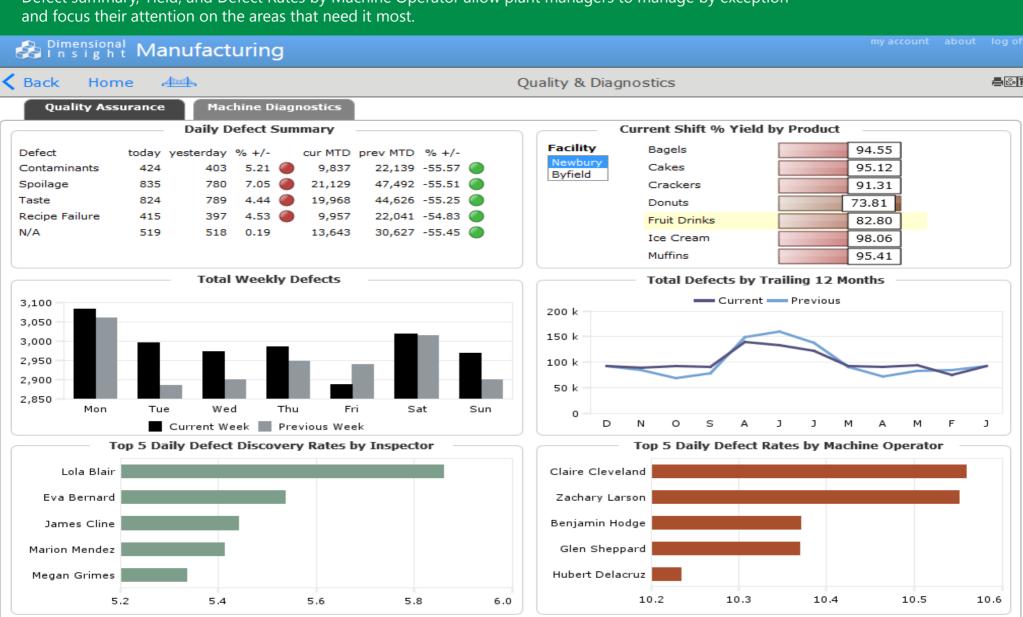

Sales Performance Dashboards

Pick from several styles of sales performance dashboards or scorecards to reveal trends by Sales Manager or individual Sales Rep.

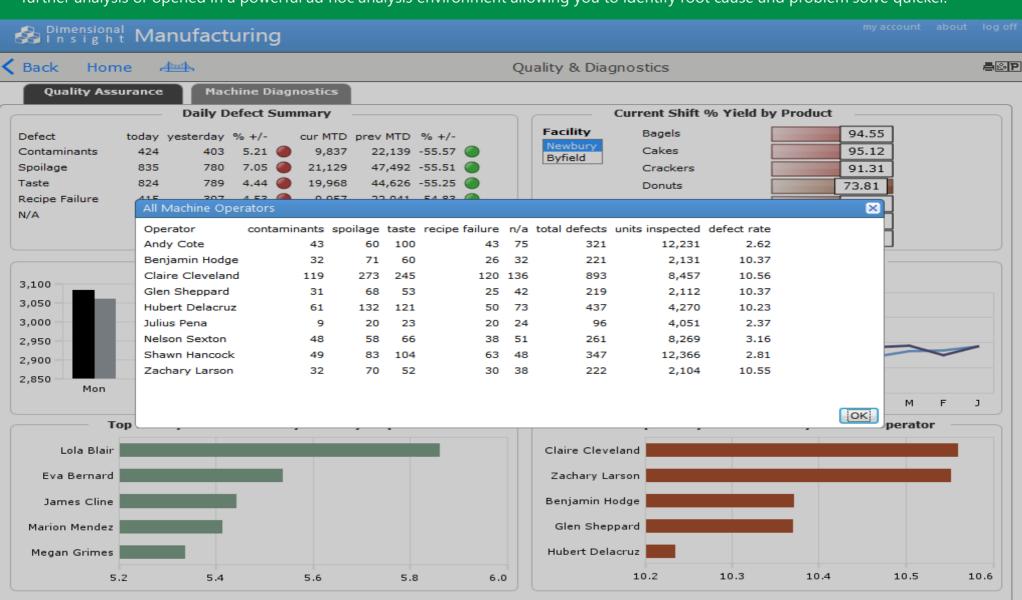

Quality Assurance

Defect summary, Yield, and Defect Rates by Machine Operator allow plant managers to manage by exception

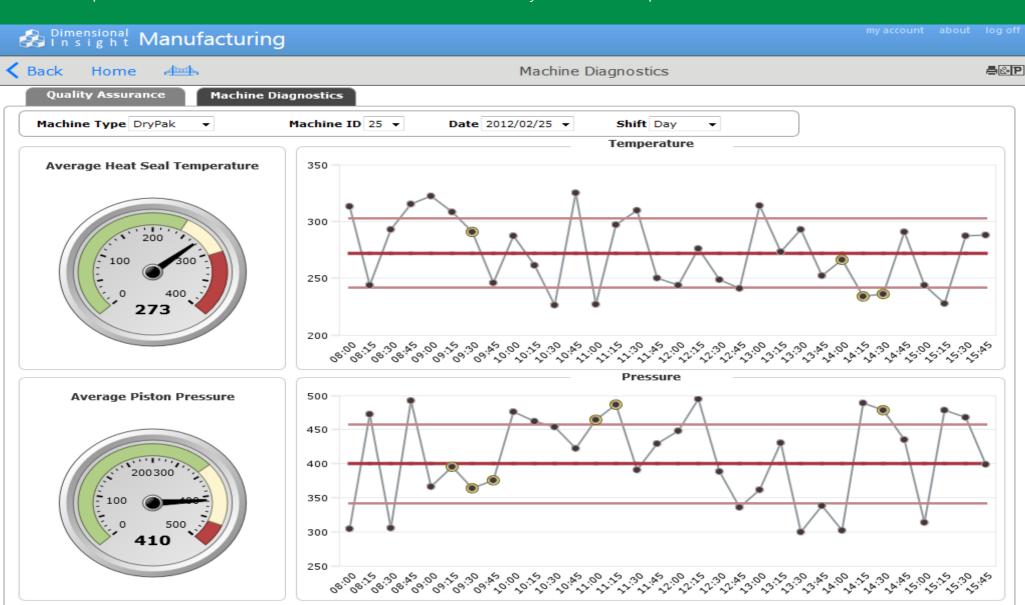

Self-Service: One-Click Access to Detail

Answer your own questions with embedded analytics capabilities. All indicators, charts, and graphics can be made "live", exported to Excel for further analysis or opened in a powerful ad hoc analysis environment allowing you to identify root cause and problem solve quicker.

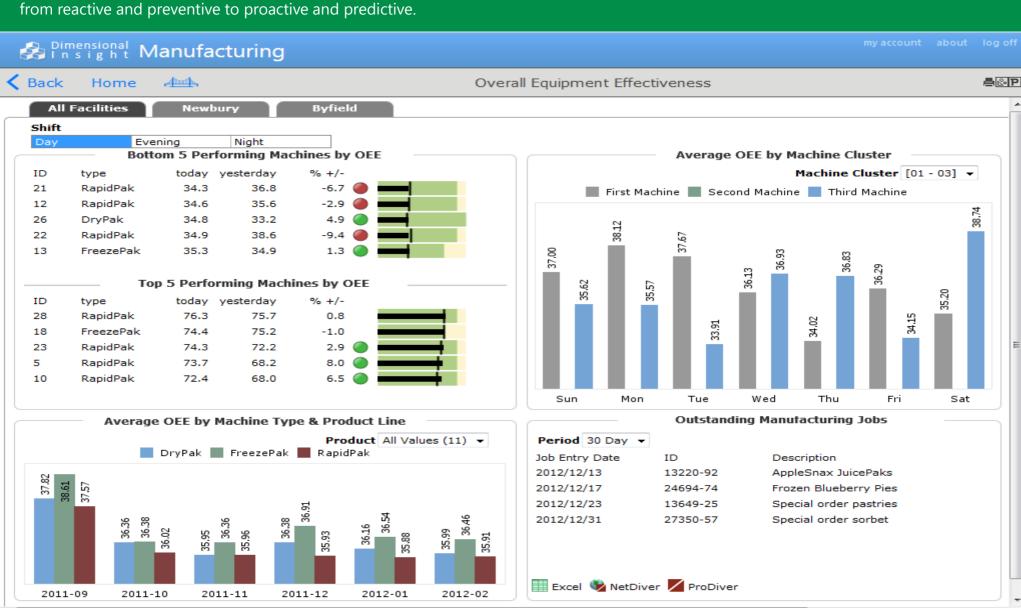

Machine Diagnostics

Statistical process control charts and customizable run rules reduce costly downtime and process failures.

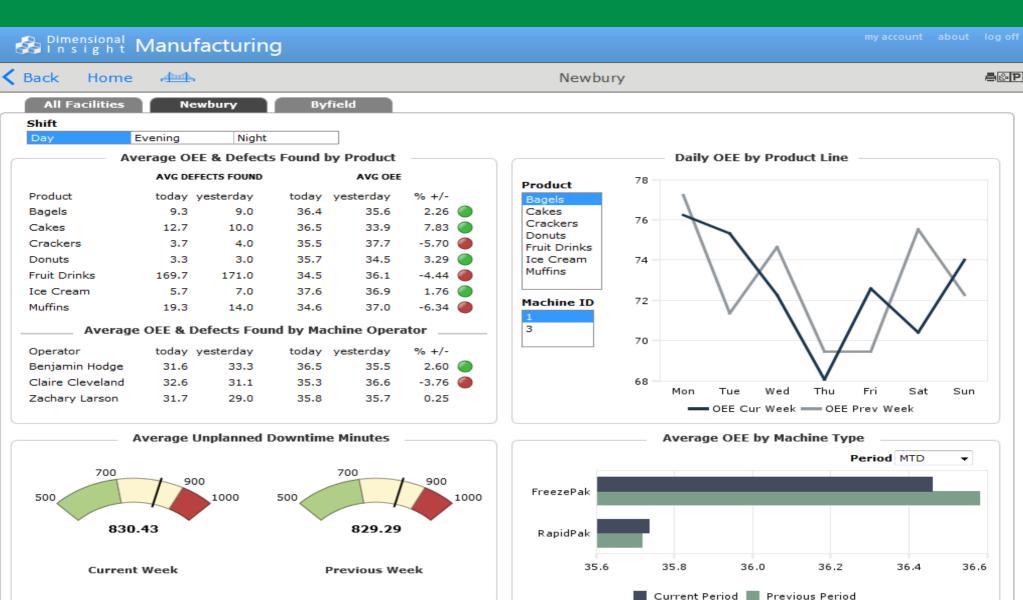

Equipment Effectiveness

Apply predictive maintenance technology and shift maintenance and service strategies moving your organization from reactive and preventive to proactive and predictive.

BI Built for Manufacturing

With purpose-built business intelligence applications that accelerate your time to value, Dimensional Insight has decades of experience developing high-impact BI solutions for discrete and process manufacturers. Optimizing your processes and identifying inefficiencies requires a complete understanding of how products and customers consume resources, including a data-driven view of your supply chain, support functions, and infrastructure. Our core BI platform, The Diver Solution™ (Diver) provides true manufacturing intelligence, enabling managers to conduct cost and profitability analysis and gain visibility into operations. **Need better visibility into asset utilization, quality, or costs? Ask us how we can help.**
