

# Diver Platform

## Data Analytics, Data Governance, and Data Management Simplified

## Family of Data Tools, Industry Applications, and Delivery Platforms

The complex nature of big data often requires businesses to employ dozens of disparate data sources and information sets to satisfy all business requirements. Assembling this data into a single, actionable set of information can be difficult, costly, and time-consuming, preventing key decisions from being made in a timely fashion. How can you dive in and find the answers you need? Business intelligence (BI), reporting, and analytics solutions like Diver Platform and Diver's applications provide you with the insights you need to turn data into action.

## DIVER PLATFORM AND APPLICATIONS INCLUDE:

### Data Integration

Diver's powerful ETL (Extract, Transform, and Load) tool set can easily integrate all your enterprise internal / external data from multiple sources and in multiple formats, providing a validated and complete view of all information.

### Information Delivery & Applications

Diver simplifies the information delivery process and ensures users are given timely access to business-critical metrics at the right time, on the right device, in a format that is useful to their role. Diver includes a BI server that handles user authentication and access control based on the user, group, and role—at the object, column, and row levels.

### Interactive Dashboards & Scorecards

Diver ensures users are given timely access to business-critical metrics in a format that's meaningful to their specific roles, while acting as a reliable, centralized information access point.

### Data Visualization & Analytics

Users have the ability to easily identify trends and exceptions within the data by utilizing data visualization features. Data can be presented to users in multiple ways: interactive maps, indicators, bullet charts, trend lines, and more.

### Ad Hoc Analysis & Self-Service Reporting

Diver users have the ability to view information at a summary level and then "dive" directly into more detailed views to understand root cause. Diver enables users to dive in any direction they wish without the limitations of preset "drill paths" or hierarchical constraints.

## DIMENSIONAL INSIGHT'S INDUSTRY APPLICATIONS

**Measure Factory** provides a business rules engine designed to put governance stakeholders and subject matter experts (SMEs) in the driver's seat. These users can view and tailor the relevant measures and business rules.

**Physician Performance Advisor** displays a consolidated view of physician performance and enables healthcare organizations to achieve compliance, improve practice patterns, and motivate physicians to excel.

**General Ledger Advisor** enables users to access the data necessary to manage costs, increase cash flow, optimize revenue cycle management, and improve efficiency.

**Meaningful Use Advisor** provides tools to not only monitor compliance with Meaningful Use but also to analyze data in real time.

**Distributor Advisor** gives users the ability to navigate around presentations, sales data, and metrics data in real time.

**Program Advisor** provides the ability to manage programs across suppliers and SKUs to quickly know program status and where to take the actions to ensure program success.

**Supplier Advisor** allows users to gain access anywhere to sales tools and information.

# Multiple Devices and Information Beyond Data

DiveTab™, our newest addition to Diver, allows users to interact and gain visibility to data and other information on an iPad®, Windows®-based tablet, PC, and iPhone®, both connected and disconnected from the internet. Providing the ability to create reports, dive into details, show videos, make presentations and store, read, export, and email documents gives everyone the flexibility they need be successful.

## Hassle-Free Administration & Maintenance:

- Real-time alerts
- Event scheduling
- Automated report distribution
- Centralized account administration & security

## Diver Platform Deployment Options:

- On-premise
- Cloud (SaaS)
- Mobile
- Hybrid capabilities
- Dashboards
- Scorecards
- Ad hoc analysis
- Exception reporting
- Alert notifications
- Data integration
- Data discovery

## ABOUT DIMENSIONAL INSIGHT

Dimensional Insight is a leading provider of business intelligence (BI) and information delivery solutions. We provide data integration, reporting, analytics, and dashboard capabilities embedded in our core BI platform as well as a portfolio of analytics-focused applications. These solutions enable users to gain insight into their data, allowing them to make better decisions that improve productivity.

Founded in 1989, we have thousands of customers worldwide and we consistently rank as a top performing BI platform by customers and industry analysts in our core market segments. Our team of experts apply their real-world experience to all our solutions to ensure that we are helping our customers meet the unique challenges of their industry to increase efficiency, reduce operating expenses, and increase profitability.

**Gain measurable insights with Dimensional Insight's applications and tools. Get the information you need anytime, anywhere to make informed decisions. Create presentations, view and export documents, and store diverse content on your iPad, Windows-based tablet, desktop, laptop, or iPhone in a single interface for connected or disconnected use at unprecedented speed.**

## CONSULTING & CUSTOMER SUPPORT

Dimensional Insight's professional services team offers an array of services that span the entire project life cycle—from needs assessment to system maintenance. Our consultants employ best-in-class project delivery practices to design, implement, and customize your Diver deployment. Our consultants draw on their extensive knowledge of your industry to deliver optimal results, faster implementations, and increased cost savings for our clients. We partner with each of our customers to ensure rapid implementation of all BI project initiatives. Our #1 objective is to provide the expertise and process knowledge to maximize return-on-investment and minimize risk.

## TRAINING OPTIONS

Diver training helps users, developers, and IS / IT staff fully understand and benefit from the power of Diver. Courses are delivered onsite at customer organizations or online. Courses can be customized to meet specific needs and organizational challenges.

## DIVER PLATFORM IS A COMPLETE BI SOLUTION SET

Every implementation includes the installation of all back-end server and production components. There are no hidden costs or expensive third-party tools required to deploy additional features. Users access data through a number of interface options depending on their specific information viewing and analysis needs.
