

# InfoKit™

BUILT ON DIMENSIONAL INSIGHT'S DIVETAB™ MOBILE PLATFORM

Access and share content—anytime, anywhere

# InfoKit

Built on Dimensional Insight's DiveTab mobile platform, InfoKit is your one-stop Partner Relation Management (PRM) software. InfoKit will keep you and your users up to date with the most recent data and documents inside and outside of the office. Your communities will always be informed with the powerful information they need to increase productivity and revenue.

## INFORMATION SEEKERS—WANT INFORMATION FAST AND EASY

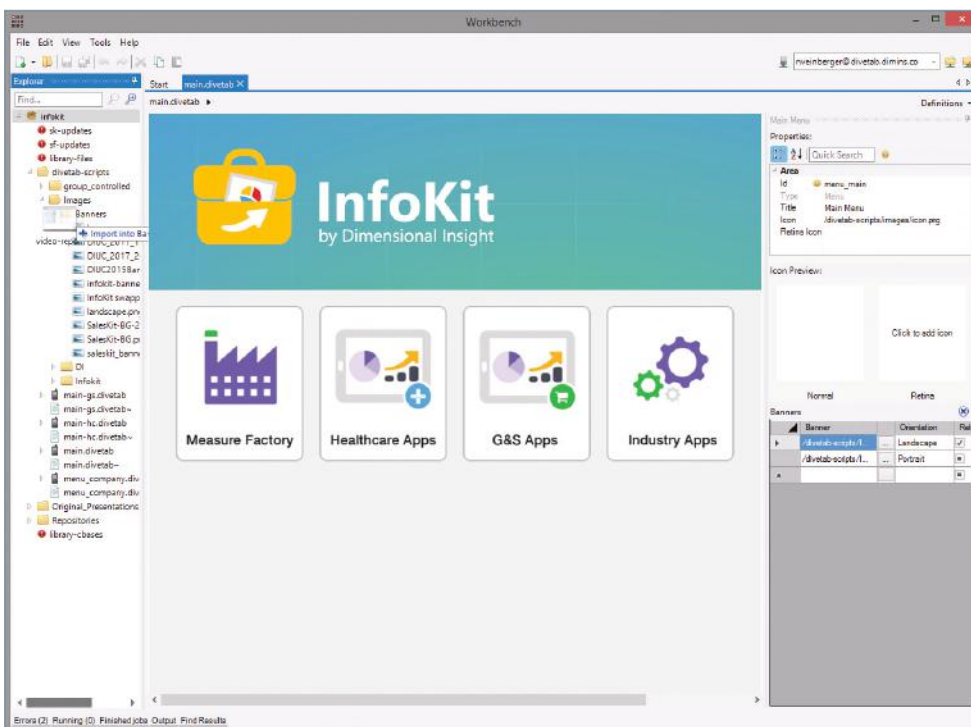

No matter what industry you're in, InfoKit makes it easy for employees, partners, and customers to share and access information. Unlike other software, InfoKit only distributes current and accurate data so your team always stays on the same page. With sharing features such as information loading, user syncing, and interface delivery options, InfoKit won't fail you or your information delivery.

## ACCESS ANY TYPE OF INFORMATION—ON INFOKIT'S INTERFACE

InfoKit's content repositories allow you to store and access content such as presentations, house brochures, data sheets, documents, cost sheets, pictures, and videos. The unique tabbing carousel allows for easy organization of PowerPoint presentations that enables you to jump to key points of interest without scrolling through an entire presentation. InfoKit's syncing feature alerts you to new and updated information.

## CONNECTED OR DISCONNECTED MODE—SYNC AND GO

Once your user communities sync, they can view and download information without connectivity to a Wi-Fi network. InfoKit is not dependent on internet access, so you can share data whenever and wherever.

*Drag and drop images to their repository access point via Workbench, sync your InfoKit device, and you're done. Images are instantly available to your InfoKit users all over the world.*

## SECURE AND ACCURATE

Providing role-based privileges, only the right people are granted access to information when they need it most. Access control features ensure that the information that your users are seeing is always governed, providing immediate and secure access to the latest information at any time, from any location.

## INFORMATION MADE RELEVANT

Using topic icons, InfoKit lets you be the designer. Choose how you want to display your information to share with your community. Whether you want to calibrate information over time or populate based on the most-used information, InfoKit will always let you know what information is being accessed. Depending on the user community, InfoKit also allows modifications to dictate usage of decrease the need to create information that isn't being used, so only the most sought-after information is being shared.

## BUILD TRUST AND CONTINUED USAGE

By trusting InfoKit with your information, users won't want to turn to other software. Users adopt software that delivers value. Value generates trust, and trust generates user adoption.

## INDUSTRY USES

- ❑ **Partner Relationship Management:** Keep channel partners by providing them with the latest sell sheets, promotions, and new product announcements to keep them engaged.
- ❑ **Social Worker & Discharge Planner:** Provide patients with treatment information in a consistent, convenient, and compliant way.
- ❑ **Inside/Outside Sales Staff:** Provide reps with branded content that is current and accessible on or offline from an array of devices.
- ❑ **Human Resources:** Provide employees with the information they want, when they need it—day or night—and decrease requests on HR.
- ❑ **Field Service Representative:** Enable field service reps to expedite customer product literature requests in the field to increase customer satisfaction.

### About Dimensional Insight

Dimensional Insight is a leading provider of integrated business intelligence and performance management solutions. Our mission is to make organizational data accessible and usable so everyone from analysts to line of business users can get the information they need to make informed, data-driven decisions.
