- Emergency department hold patients

AD HOC ANALYTICS

Emergency Department Advisor provides users access to emergency department volumes, throughput, and other key performance measures through Diver’s analytical dashboards. Users can view key metrics and then click on any number or graphical view to answer questions about the underlying detail. Users instantly answer questions and gain insight on opportunities for improvement.

Diver’s powerful ad hoc interfaces (ProDiver & NetDiver) allow for sophisticated analysis of detailed data that will extend and supplement the summarized measure data provided by the dashboards. With Diver, users can explore their data and discover insights without knowing in advance the questions they want to ask about the data.

The ad hoc databases provide the ability to analyze: Emergency orders, Encounters, Charge detail, Procedures, Diagnosis.
