

Continuously Monitor Performance 360-Degrees— Across Multiple Care Settings & Criteria

Provider Advisor enables hospitals to continuously monitor physician performance with 360-degree assessments of physician activity across multiple care settings and performance criteria. It does more than just make it easier for you meet Joint Commission reporting requirements. It can:

- display relevant metrics and benchmarks in concise dashboards to rapidly detect performance issues
- link to data beneath individual physician and organizational performance
- facilitate re-credentialing with physician-specific views
- filter data by care setting, visit type, and relationship to patient to ensure objectivity during physician reviews to better motivate improvements

Capture More Improvement Opportunities

Provider Advisor gives hospital managers the ability to identify specific opportunities for improvement at the physician, practice, specialty, facility, and organization levels, by:

- comparing individual physicians to standard benchmarks, as well as peers within their practice, specialty, and facility
- spotting outliers responsible for a disproportionate impact on organizational performance
- detecting patterns across the organization that reveal best practices
- understanding how physician practice patterns affect overall hospital performance
- focusing efforts on improvements that most impact outcomes, meet cost containment goals, and increase revenues

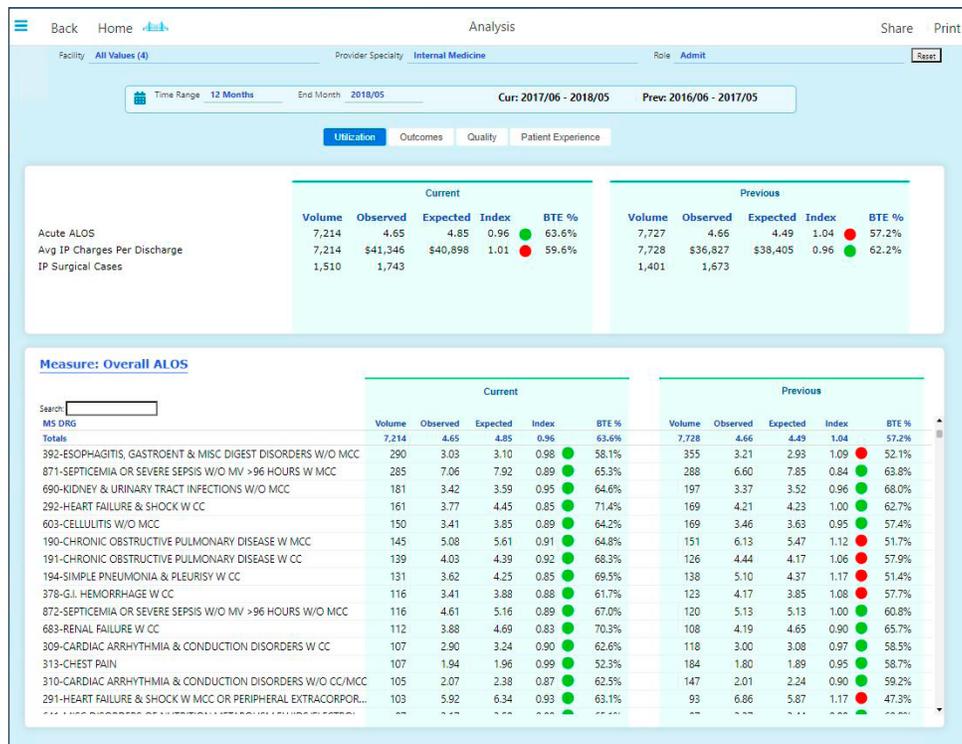

Streamline Access to Data through Powerful Data Integration

Data from existing clinical repositories and operational and financial systems is automatically consolidated with custom and preferred third-party benchmark data to provide up-to-date information when it's needed.

- Encounter-based data can be updated daily or weekly. This provides physicians access to assessments based on their most recent cases.
- Periodic data, such as patient satisfaction surveys, can be updated at appropriate intervals.

Achieve Compliance with Less Time and Effort

Provider Advisor compresses the time and effort required to meet The Joint Commission's requirements for Ongoing Professional Practice Evaluation (OPPE). One hospital system saved over \$200,000 and 1,200 man-hours of labor on Joint Commission reporting with Provider Advisor.

Motivate Performance Improvements

Motivating physicians to change behaviors requires that they trust the data used in their reviews. Provider Advisor enables the physician executive and physician to collaboratively review recent cases and dive from summary metrics to underlying details—down to the patient encounter level. The ability to filter by patient relationship—e.g., look only at attending physician roles—promotes constructive dialogue. And specific cases can be easily excluded, where warranted.

Business Intelligence Platform

Provider Advisor leverages Dimensional Insight's Diver Platform, eight time winner for Best in KLAS for Business Intelligence and Analytics.

About Dimensional Insight

Dimensional Insight is a leading provider of analytics, data management, and performance management solutions, offering a complete portfolio of capabilities ranging from data integration and modeling to sophisticated reporting, analytics, and dashboards. The company is an eight-time Best in KLAS winner in healthcare business intelligence and analytics, most recently ranking #1 in 2021. Founded in 1989, Dimensional Insight has thousands of customer organizations worldwide. Dimensional Insight consistently ranks as a top performing analytics organization by customers and industry analysts in its core market segments including healthcare, manufacturing, and beverage alcohol.
