

Workbench 7.1 Overview:

An Integrated Development Environment

Objectives

In this class, you will learn how to use Workbench to connect and work with projects.

Prerequisites

DI recommends *ProDiver: Introduction to Advanced Data Analytics* or equivalent experience.

Intended Audience

This class is intended for developers, administrators, and users that perform any part of the ETL process, create data structures for others, or are responsible for user provisioning and security.

Delivery

This class is interactive, runs for one hour, and is delivered online by a training consultant.

Students have access to DI software using a training virtual machine.

Curriculum

Workbench Overview

- What is Workbench?

- Dimensional Insight Engines and Clients for Analytics

- Workbench Interface

- Workbench Components

- Using Workbench Explorer

- Status Bar

- Workbench Help

Workbench Connections

Connections Overview

Working with Workbench Connections

Projects

What are Projects?

Creating a New Project

Default Folder Structure

Examining Your Data
