

DiveLine 7.1 Administration:

Users, Home Projects, and Access Control

Objectives

In this class, you will learn how to use Workbench to manage users and groups, and control access to data.

Prerequisites

- *Workbench Overview: An Integrated Development Environment*, or equivalent experience, is required for this class.
- *ProDiver: Introduction to Advanced Data Analytics* is suggested.

Intended Audience

This class is intended for administrators and users that are responsible for user provisioning and security.

Delivery

This class is interactive, runs for a total of two hours, and is delivered online by a training consultant.

Students have access to DI software using a training virtual machine.
