

Charting a New Course

Dimensional Insight Users Conference (DIUC)

September 21–22, 2021 | Online | 1:00–3:00 PM (EST)

Agenda

Tuesday, September 21 | 1:00-3:00 pm

Kathy Sucich,
VP of Marketing

Welcome to our 2021 Dimensional Insight Users Conference!

For four hours over two days, you will hear presentations from Dimensional Insight customers and employees on the most impactful ways to use Diver Platform® and applications. Our emcee, Kathy Sucich, will serve as your guide over the course of the conference and introduce you to our various topics. Sit back and get ready to learn!

Fred Powers,
Co-founder & CEO

Stan Zandarotti,
Co-founder & CTO

Jaime Clark,
Technical Director

Michael Phillips,
Technical Director

Keynote

One thing that's clear from the last year or so is that businesses will never go back to the "way things were." We are all charting a new course. While that may seem scary, there are ways to be more certain even in the face of uncertain waters. Your data is central to this. In this keynote, Dimensional Insight technology leaders will talk about the latest advances in our technology that will help all of us in charting a new course for our companies.

Gina DellaVedova,
VP, National Sales

Customer case study: Banville Wine Merchants

See how Banville Wine Merchants is educating its sales team and providing them access to data so they are more fact-based sellers.

Agenda

Tuesday, September 21 | 1:00-3:00 pm

Colby Lutz,
Senior Business
Intelligence Analyst

Customer case study: UPMC Western Maryland

Learn how UPMC Western Maryland is using DivePort's input technology to transform a previously manual process of combining census data with physician rounding data into an automatic process that provides data that can be used in stamps, matrix portlets, and other types of dashboards.

Keith Garvey,
Senior Training Consultant

Advancing Your Diver Knowledge

Did you know Dimensional Insight has tons of resources to help you get the most out of Diver? Find out where you can get help, learn cool new tricks, and more.

Annie Dunn,
Software Engineer

Creating Your Own Personal Dashboard

Increase your efficiency by creating your own personal dashboard. Learn how to easily access the information you need for your role every time you log in.

Enabling Your Users through Self-Service Analytics

The more users take charge of their own analytics exploration, the faster adoption numbers will rise and the deeper insights users will gain. See how you can better enable your users through self-service capabilities.

John Hu,
UX Designer

Make an Impact with New Dashboards

Learn about new, impactful chart types that both impress users and increase their understanding of data.

Explore Your Data with New Display Stamps and Visualizations

Learn how to show your data in new and impactful ways with our DivePort stamps and visualizations. See how these displays are built and how several elements can interact to create visualizations that will greatly benefit your users.

Nancy Berkowitz,
Industry VP

Simplify Your Data Access with Diver Gateway

You may have heard of Diver Gateway, but what does it mean for you? See how you can simplify your access to data and applications and more easily gain insights.

Agenda

Tuesday, September 21 | 1:00-3:00 pm

Doug Powers,
Application Developer
