

Diver Platform®

What's New in 7.2?

DivePort Upgrades

My Library

Access all your data with ease, style, and customizability with My Library. Featuring new “shelf” functionality, your data and shortcuts are all organized in a way that makes navigating a snap.

The shortcuts feature helps you find what you need faster than ever before. Your shortcuts are stored on your DiveLine, as well as in shared folders to make co-working a breeze.

New QuickView Portlet Functions

Utilize new button display types such as flex, hidden, and calendar. You can always find the time with the new date picker for Calendar QuickViews.

Additional Default Stamp Types

With default stamp types, you can set a certain stamp type to be created every time you make a new stamp. Find and select measures and filters to accompany your stamps using the newly added dialog boxes.

Spectre Upgrades

Faster cBases

A more efficient design for cBases helps you create them even faster using Spectre Build.

New Input Types

Excel—Spectre has a new file input type for Microsoft Excel files. Excel spreadsheets can now be imported and processed like other tables. This feature is coming to both Spectre build scripts and the Spectre Build Flow Editor.

JSON—The JavaScript Object Notation file format is now supported for Spectre inputs.

Datagen—Need test data fast? Spectre now supports the data generation input. Quickly create thousands of rows of test data to ensure that your Spectre scripts are ready for the real deal.

PostgreSQL—Spectre now supports inputs from the world's most advanced open-source database.

Workbench Upgrades

Markdown Editor

Edit rich text documents in style with the new real-time markdown editor. See your visual changes as you make them.

Updated Table Editor

The new table editor lets you make even more changes to tables with ease and speed. Click and drag columns to change their positions, handle large tables more efficiently, and enjoy a comprehensive log of all changes.

ODBC Registry

Connect to multiple data sources with one ODBC connection thanks to the new ODBC registry.

About Dimensional Insight

Dimensional Insight is a leading provider of integrated business intelligence and performance management solutions. Our mission is to make organizational data accessible and usable so everyone from analysts to line of business users can get the information they need to make informed, data-driven decisions.
